

List of major amendments, NordicCert instruction version 11-2026

Minor revisions of e.g. year, spelling, outdated texts, and minor clarifications and reformulations etc are not included in the list. Changes that apply to several sections might not be listed in all sections where they apply.

General

- A Certificate Annex, including the information necessary to verify the identity of the material through laboratory analysis, will be distributed together with the certificates from 2026 onwards.

Chapter 3

- The method for determination of the distribution between vehicle types has been updated.

Chapter 4

- Section 4.1: The distance between two adjacent rows of lines has been corrected.
- Section 4.3: The rules regarding the measurement and evaluation of material thickness have been changed.
- Section 4.4: The information about the measurement of application rate of drop on materials has been changed.
- Section 4.8: “The administration of the road trial will arrange...” has been changed to “The administration of the road trials aims to arrange...” as we cannot guarantee the realisation of the open day.
- Section 4.8: A clarification that participants will have access to their *materials that were applied on the test field the year before* on the open day has been added.

Chapter 6

- Section 6.1: Information on how long samples are stored has been added.

Chapter 7

- Section 7.3: Information about how markedly deviating measurements are handled has been added.
- Section 7.8: A new subsection *7.8.1. Certificate format and content* has been added.

Chapter 8

- Section 8.1: The participant fees have been increased by SEK 5 000 for all types.
- Section 8.1: Clarification about binding registration has been added.
